PROFESSIONAL SUMMARY

Product Manager with 3 years of experience optimizing operations and shaping system strategies. Proven track record in driving efficiency, reducing administrative delays by 30% through data-driven prioritization and saving users 10+ hours weekly via platform enhancements. Expertise spans user discovery, defining requirements, and delivering solutions in agile environments. See portfolio for detailed project case studies.

PROFESSIONAL EXPERIENCE

Product Manager, HNG

August 2025 - November 2025

- Analyzed Telex for usability gaps and product inconsistencies, documenting 30+ issues for QA and engineering. Ensured critical user-facing bugs were prioritized, contributing to a smoother user experience
- Conducted exploratory analysis, reframing reCAPTCHA as a data product, influencing team strategy on value generation.
- Authored a PRD with clear user stories to consolidate fragmented flows, clarifying requirements in Asana to reduce rework and unblock engineering delivery.

Product Manager, GENZIFY AFRICA

September 2024 - November 2024

- Reduced administrative delay by 30% by designing a KPI dashboard in Mixpanel, enabling data-driven prioritization for the product listing workflow.
- Contributed to customer-facing e-commerce features through product discovery, requirement definition, and backlog refinement under senior PM and engineering guidance.
- Co-authored the core PRD and championed 4 user experience enhancements for a full-stack platform redesign, with all proposals being validated and adopted into the final shipped product.

Operations & Systems Manager, Future Ambassadors Montessori School

Sep 2019 - July 2022

- Orchestrated the operational roadmap for academic cycles and tech initiatives to modernize systems and support growth, directly contributing to steady enrollment increases.
- Spearheaded the launch of a new LMS platform to solve manual grading and low digital engagement, introducing remote testing and personalized tracks that cut grading time by 10 hours per teacher weekly.
- Served as the de facto data product owner, transforming system and student metrics into an actionable strategy that closed key insight gaps and increased parent satisfaction.

Product Lead, EcoLoop Initiative, UN Academic Impact & MCN

Sep 2025 - Nov 2025

- Led product conception for a waste-management mobile app, conducting 50+ user interviews to identify pain points and translating insights into validated user flows and a high-fidelity Figma prototype.

SKILLS, TOOLS & CERTIFICATIONS

- **Product Strategy & Discovery:** User Research & Validation, Hypothesis Testing, JTBD, User Story Mapping, Product Roadmap Development, OKR Frameworks, Competitive Analysis.
- **Data & Analytics:** SQL, Google Analytics, Mixpanel, Pendo, A/B Testing, KPI Dashboard Design, Data-Informed Decision Making.
- **Technical & Design:** Figma (Prototyping & Wireframing), Maze, Loom, HTML/CSS, Python, GitHub, AI-Augmented Product Development (LLMs).
- **Execution & Agile Delivery:** Agile/Scrum Methodologies, PRD & Spec Writing, Backlog Grooming (RICE, MoSCoW), Sprint Planning, Jira, ClickUp, Asana, Miro.
- **Certifications:** Registered Scrum Basics (Scrum Inc), Product School (AIC™), Google AI/Cloud for Product, Digital Product Management (UVA/Darden), Product Management (Pendo.io)

EDUCATION

Bachelor of Science in Economics.
Lagos State University
